

# Setting up Application Environment

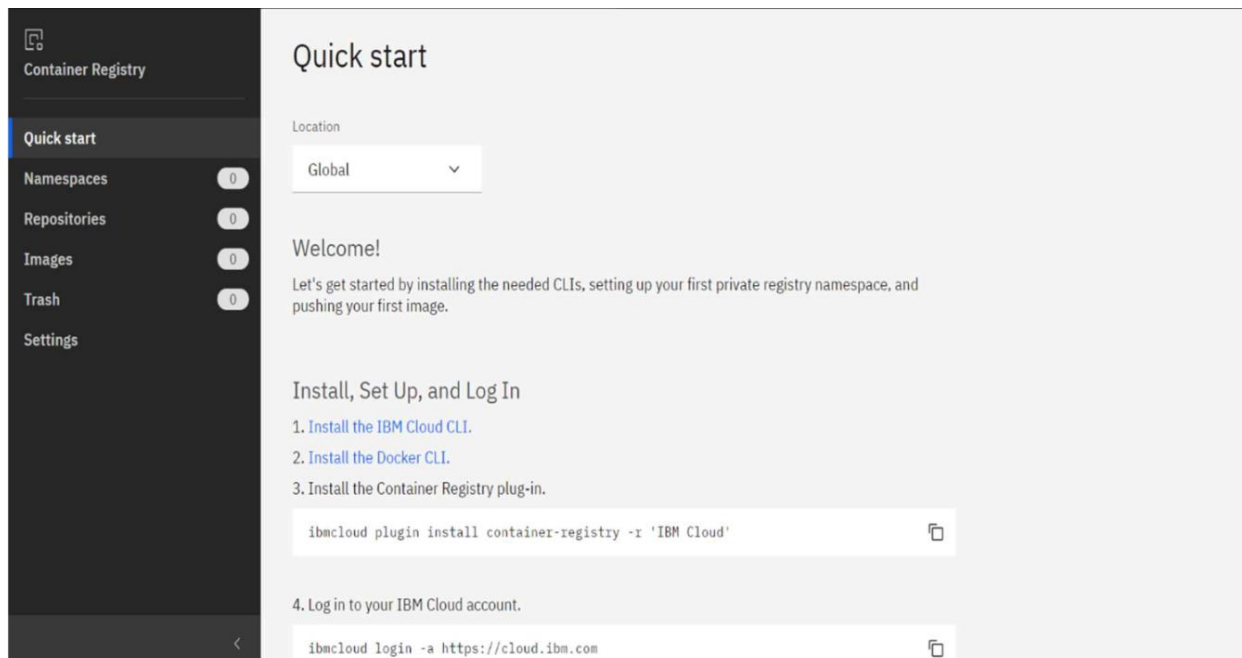

## Docker CLI Installation

Date	12/11/2022
Team Id	PNT2022TMID1445
Project Name	Plasma Donor Application
Maximum Marks	4 Marks

### Step 1: Login to cloud account

### Step 2: click container registry

### Step 3: Click quick start and install the Docker CLI for Windows

The screenshot shows the Docker Engine installation overview page. The sidebar on the left lists navigation options: Docker Desktop, Docker Engine (Overview, Install, Installation Overview), and Post-installation steps. The main content area features a 'Supported platforms' section with a table showing supported operating systems and architectures. The right-hand sidebar provides page details (6 minute read), tags (docker, installation, install, Docker Engine, Docker Engine, docker editions, stable, edge), and a table of contents.

Platform	x86_64 / amd64	arm64 (Apple Silicon)
Docker Desktop for Linux	✓	
Docker Desktop for Mac (macOS)	✓	✓

### Step 4: click next and setup finish

This screenshot is identical to the one above, showing the Docker Engine installation overview page. It includes the same sidebar, main content area with the 'Supported platforms' table, and the right-hand sidebar with page details and tags.

Platform	x86_64 / amd64	arm64 (Apple Silicon)
Docker Desktop for Linux	✓	
Docker Desktop for Mac (macOS)	✓	✓
